Areal-trumf

Kortspill for 2–4 elever, som Topp Trumf. Den som har figuren med størst areal, vinner stikket. Elevene må regne ut arealet av rektangler, kvadrater, parallellogrammer, trapeser, trekanter og sirkler. Varighet: 20 minutter.

Slik spiller dere

1. Skriv ut side 2–4 til hver gruppe og klipp ut de 24 kortene. Bland og del ut alle kortene.
2. Alle snur det øverste kortet samtidig og regner ut arealet av figuren sin på et kladdeark.
3. Den som har størst areal, vinner alle kortene i stikket, men bare hvis utregningen er riktig. De andre kontrollerer.
4. Den som har flest kort når tiden er ute, vinner.

Formler

Rektangel og parallellogram: $g \cdot h$ · Kvadrat: $s \cdot s$ · Trekant: $g \cdot h : 2$ · Trapes: $(a + b) \cdot h : 2$ · Sirkel: $\pi \cdot r \cdot r$, bruk $\pi \approx 3{,}14$

Til læreren: arealene

1 rektangel **40 cm²**	**2** rektangel **39 cm²**	**3** rektangel **54 cm²**
4 kvadrat **49 cm²**	**5** kvadrat **36 cm²**	**6** kvadrat **81 cm²**
7 parallellogram **44 cm²**	**8** parallellogram **42 cm²**	**9** parallellogram **60 cm²**
10 trapes **30 cm²**	**11** trapes **32 cm²**	**12** trapes **28 cm²**
13 trekant **35 cm²**	**14** trekant **66 cm²**	**15** trekant **20 cm²**
16 sirkel **28,3 cm²**	**17** sirkel **50,2 cm²**	**18** sirkel **78,5 cm²**
19 rektangel **45 cm²**	**20** kvadrat **25 cm²**	**21** trekant **26 cm²**
22 parallellogram **27 cm²**	**23** trapes **48 cm²**	**24** sirkel **19,6 cm²**

Variant: Spill om *minst* areal, eller la elevene velge om stikket gjelder areal eller omkrets (bare for rektangler, kvadrater og sirkler).
